NEWPORT.

BY CRANSTON & NORMAN, : 127 THANKS STREET,

FRIDAY MORNING, OUT. 4, 1950.

T E WHIG CONVENTION AT SYRÉCUSE - We have been attentive observers, of the extraordinary doings of this Convention and feel that as a part of the great While family, we owe it to the chuse to express sur views in relation to this lamentable achiem. At a moment when every true hearted Whig in New York ought to rejoice that her honored son is at the helm of stairs, a handful of demagogues, who regard his elevation as a bor to their ambilions and fanatical, designs, repaired to the Conveyion determined in gire a phase to the predictings which should detach the Whis party, and especially should cast a reflection on the President and those honored patricts who had so triumphantly calmed down the tempest which had so spitated our country. Two or three abolition editors and the trumpeters of Sonator Seward had fixed their minds upon converting the Whig party into a sectional or abolition party, and thus to revive all the excitement and sgitation of the past year.

· Instead of pursuing a wise course, as did the Whigs of Massachusatte at their Convention at Worcester, Mr. Greeley and others were carnest for the adeques, of Resolutions which should gederae the attra Resolutions which should seed us the stars source and sentiments of William 1. Server of the star source and sentiments of William 1. Server of the sentiments of the sentiment of the sentiment

dong so would we are suit, have cound the trumpet-note for the breaking up of the party in every State of the Union - It is Tax better to lose the election in Nev York, than to tell the Whige of every section of the land that the New York Whige are of the type of Soward, Weed, Greeky,

A caroful analysis of the members of the late Convention untirely convinces us that the majority of the Convention came from a few abolition counties, and that the State at large is sound, at heart. We honor Grangor. Duer and their secoding brothren, and we are sure that the Whige of New York and the Whige of the Union will admire their fidelity and noble primptitude, "When we have such in Privilent, and and a Calenda se the Wishes can now them a marificial offering to any abolition

We feel confident that the Whig party will ere long be compelled to denounce and disown Seward, Weed and Greeley because they are all unprincipled deina gogues, and care nothing for the welfare of the party, goless they can rule it. In our opinion the sooner this stop is taken, the batter it will be for the party.

163-The "Savior of his country," is the new appellation, which has been given to Gen. Cass by some of his political friends It seems that the "moise and confusion" and nut provent him from mounting the res trum at old Tammany, a few days since; for the purpose of receiving the congratulations of Mike Walsh, the notorious Ryncocs, and a few other such choice spirits. The fat old Savisr would have manifested more discretion if he had declined this honor, than he did in tunning, away from Cleaveland, on account of the " naise and confision," two years ago, just before the Presidential election, because, lie did no wish to express an opinion on River and Harbor improvements.

Thelonger we live, the more we are certain that the great difference between men, the great and the insig nificent, is energy-invincible determination-an honest purpose once fixed-and then death or victory. That quality will do anything that can , be done in the world; and no talents. no circumstances, no opportunity will make a two legged creature a man without it.

&r The population of London is estima ed at four times that of New York, or about 2.000,000, and yet the English tnetropolis is nearly 50 per cent healthier than

We place no reliance upon the repurwhich is realo in circulation that the first secietant Post Master General, S. R. Hoblie, Eeq., is to be removed; a high-minded, honorable career and long-continued and very faithful public service preclude the pessibility of such a thing.

03 Foote, true to his rolling, possion, wound up the sersion by a bloss. (To struck a brother Senator for not believing him a goutleman. If he has made up his mind to fight his way through the world the sconer he gives himself a quietus with his own revolver the hetter. There is not a deeper-fixed idea in the great majority of the American people, than that Senafor Henry S. Foote of Mississippl is a blackguard and a bully fand all the pummeling and cudgeling in the world will not knock it out. His drawing blord from Fremont's nosq will have no more effect upon it, then his hanging the next abolitionist he catches in Mississippi. It can never be statted one bair's breadth until he finds some means to throsh out of mon's memories his divgraceful words and acts this session. Fremont himself, as we understand it, don't even now hard as was the rectitying clip, acknowledge that he was mistaken. He has not respected; or it he has, it has only been done in a Pickwickian, or if not in a Pickwickian, in a Satanio seaso, such au Fauat cingloyed when he styled the d-1 himself a " gentle-

We regret it as a national misfortune that we have such a man in our Spiratorial counelle. If his acts merely reflected disgrace upon himself no one would complain, for it would only darken his reputation into the same color as his rent character. But he is dishonoring the country. No man, probably, ever did so much within the same space of time to lower the good name of the U. S. Senate as he has done this seasion. Through his morns that highest of our deliberative bodies, whose dignity, was once the pride of all Americans and the admiration of all strangers, has suffered, and will long waffer, deep and deserved reproach: He represents a coveraign State, and we suppose there is no way of deliversecond But it Mississifint would correspond

Knowledge is its own exceeding great reward. It is not the gift of a college, particularly. In is what the mind produces whenever it acts .-Great schools are chiefly appliances for the lady, to furnish substitutes for knowledge by which to make their way in, the world. A youth who has a noble thirst for science, is not so much benefitted by a "liberal education as he is apt to imagine that he will be, before trying it. If your parents are righ and have nothing better to do with their money, let them board you at Cambridge or Yale for four years. But if they are poor, laboring people, stay with them and labor .-But don't the less strive for a liberal education. Be liberal in supplying yourself with books and time. Journey on foot and study nature and men. Ask questions of everybody and every-

Thus doing, you will probably acquire more satisfactory and useful knowledge, and what is more, sounder character and firmer health-you will be more of a man than if you distress your parents to have knowledge put into your mouth with a pop spoon. It is thus that the greatest and best men are made in every country.

BURNING THE BITS .- "Please, marm, what shall I do with the bits of candles ?"

"Take them down stairs and burn them in the kitchen, Bridget."

Off she started. At night, Bridget called the lady and asked for a candle for the kitchen.

"A candle - why, what have you done with the peices you had this morning ?"

"Faith, marm, I put them in th fre, and burnt them in the kitchen, as ye told me to this morning."

The Bishops of the Episcopal Church, new in convention at Cincineti, have the case of Bishop Onderdonk before them for consideration.

DEATH OF MAJOR MILLER .- We copy the following notice of the late Major Miller, from the Morrisrows, Pa., Democrat!

Dien.-At the residence of Dr. Darid Porter at Rostraver, Westmore land county, on Thursday, 12th Septomber, Brevet Major John Henry Milter, of the 4th U. S. Artillery. He was born on the 7th July, 1810 and had therefore "just- entered his Alst year. His remains were interred at Unioutown by the military at a place indicated by himself, some weeks about forc his death.

At the age of 14 he attached him

self to a corps of civil engineers under the command of James Shriver, deceased, then engaged in making suryovs under the Government of the United States, with a view of connecting the Potomac and Ohio Rivers by canal. The next year he accompanied the same corps, and was engaged in making surveys on the Wabash and Miami rivers, in Indiana. Here his friend and relative. Mr. Shriver, tell sacrifice to the climate and exposure. in that then wilderness country. On his return from the exploration and survey he was in 1827 appointed to a Gadetship at the Military Academy at West Point, where he graduated high in a very large class. Liminediately afterwards he was promoted to a second Lieutenancy in the 4th Artillery and stationed at Fort Gratiet at the outlet of Lake Huron. On the breaking out of the Florida war, he was ordered to the seat of war, and served there under Gen. Taylor until the conclusion of the war. He was immediately after the commencement of the war with Mexico, ordered in the field, and sailed with the expedition against Vera Cruz. Before that, however, a corps of troops under the command of Col. De Russy, having been shipwrecked on the coast of Mexico, and likely to encounter a large force of Mexicans, Major Miller was dispatched to his relich, with success. He was present and engaged in the siego and capitulation of Vera Cruz. He advanced with the invading army under Gen. Scott, and was in the battle of Cerro Gordo. His command was left to garrison the town of Puchla, where he naut to the defence of that places der ing its long siege. He was at the conclusion of the peace. He returned immediately to the United States paid a brief visit to bis family at Detroit, and was again ordered to Fart Wood. Louisiana. Upon the indication of hostile movements among the Florida 200 choristers. Indians, he was again ordered into the wilderness and evergludes of that region, where he was engaged when in November last be was advised of a catastrophe which struck a blow more fatal in consequences, than the Indian or Mexican fire arms, or the miasma of southern awamps and everglades. He had escaped through a thousand perils but this last blow struck home to his vitals. It suffered no repose-un-

SALE OF CUNARD STEAMERS TO THE Diario of the 17th-ult., states that the agent of the Spanish Government in

the expectation of a new measion of the Island. They have every reason to believe that an attempt at a revolu-

tion is to be made by the people, and hence their habte to send in strangers to rule them, lest the officers now there should fraternize with the people and hold the movement.

The trial and imprisonment of the Controy prisoners about which such a fuss was made, cost the Government \$70,000.

THE TROTH ROUGHLY STOKER .- The Troy Whig publishes the following extract from a letter from a gentle man of South Carolina to his friend io. Troy, dated Sept. 21, 1850:

"The black basis or no black basis will be the question in a year or two. They we bound eventually in the South to get by the cars about acgroes. But the Union never can smash on this point; at least the smash cannot come from the South. For this reas on, not more than one man out of ten has slayes. Now nine tenths of no people have ever yet been found wills ling to sacrifice happiness for the interest of the other tenth .- The negro owner would be ruined by a dissolution of the Union. For a dissolution would: be war instanter. Two things most follow as sure as fate; first, nine-tenths of the people would not leave their wives to fight for negro owners. For if they did, these very negroes would out their children's throats in their absence, and travish and destroy their women. These acts of negroism would grow out of the second consequence of dissolution, viz : insurrection Now you know what hot passionate creatures the masses here, are, and you know they would kill every negro on sight the moment their families were outraged. So you see that a dissolution of the states would, just as sure as there are stars in heaven, abolish slavery, completely overturn Southern society, and turn the country into a de-

Yet when this journal uttered the same thought in much milder langunge, certain Southern organs were exasperated almost to madness. There can be a little doubt, however, that most intelligent Southerners entertain privately the same view; and the na--ing lost of guilos), aldebus bus large servation will be an effectual estopper to any practical disunion movements.

TO THE LADIES.

WASHING, BLEACHING AND CLEANSING FLUID, the greatest alsor-saving article yet discovered. By its use, washing machines and boards arountirely dispensed with, and not one quarter the labor is required to do the washing of a family.

The Fluid is a chemical compound of sufficient strength to extract all foreign substances from the clothe, by simply boiling a small quantity of it with the clothes, and without the slightest injury to the most delicate fabric.

The expense is not more than that of the sone redunantly used, and lesides this it will be seen that the great wear and tear of clothing consequent upon the old method of hard reblaing upons a beard, and the according pounding barrel, in wholly avoid, and an immense raing is thus made. It is emplacically the female's friend.

ANEW & VALUAHLE IMPROVEMENT IN DAGUERRECOTYPING.

THE MAGNETIC BUFF.

MR. J. A. Williams would inform his friends
and the public that He has an improvement
upon the common magnetic hand buff, his being in
the form of a wheel and geared in such a manner
that its velosity will predece a greater quantity of
filentin Magnetic Filmit than can possibly be produced by the hand buff. In this remuier the plate
is highly polished and at the same time as well
charged with the Magnetic Fluid as to produce
Dagnetreotypes of a remetric quality almost instantily.

M. R. LAWRENCE takes great pleasure in sia ting to the inhalitums and visitors of Newport, that his new Daguerdan Gallery, opposite Atlantic House, is now need for visitors, where may be teen many specimens of considering themen and Lauters, such as the Rev Dr. Cox, Patten and Skinner, Futher Matthue, the Honderer Chy, John M. Butte &c. Also he would state that the new sky-light which ha has had constructed, is a fractimile, of the one at New York, which has gained him so, most needs tip for the hall, mellow, life-like tone or Pictures which it produces.
